Mr. Adolf Zubia, President
International Code Council
500 New Jersey Ave NW
Washington DC

Dear President Zubia:

We have listened with great interest to the concerns expressed by some of the membership of the International Code Council regarding actions or perceived actions and inactions made by the leadership of the ICC. We understand the devastating state of the economy being felt nationwide. We are all faced with tough decisions as managers of departments or divisions of local government being confronted with this historic recession.

It is our opinion that the ICC is taking the proper steps to ensure that a healthy, membership focused organization can continue to provide the services and programs to the membership now and in the future. Your actions are, in our estimation, necessary to survive in this changing economy. Thanks for being responsive and keeping the members first.

That being said we look forward to adopting and administering the 2009 International Codes and appreciate the support ICC offers in companion publications, training and educational opportunities. The International Code Council Chapters of Colorado are also active in the code change process and find the entire ICC staff available and responsive to our inquiries. As council members we will continue to support the ICC in any way we can to help ensure the economic viability and success of what we consider to be "our organization".

Sincerely,

Stephen Kanipe
